

WORKDAY ADAPTIVE PLANNING PRO

Next-generation AI and enterprise governance for modern FP&A

Adaptive Pro brings together AI-powered conversational modeling, multi-agent interoperability, advanced workflow control and automated lifecycle management – in one unified solution.

KEY INNOVATIONS

Five ways Adaptive Pro transforms how you plan

01	Adaptive Decision Intelligence DI	A flexible, conversational workspace to model complex scenarios – M&A, pricing, capacity – with full data ingestion from Adaptive, HCM, CRM and Snowflake. Explore scenarios freely, without rigid structure, while keeping full traceability into working plans.
02	Agent-to-Agent Interoperability A2A	Planning agents collaborate autonomously with specialized enterprise agents across multi-agent ecosystems. Real-time collaborative planning that safeguards sensitive financial formulas, models and data.
03	Model Context Protocol MCP	Exposes planning capabilities to MCP-enabled AI platforms like Claude, ChatGPT and Gemini. Query and act on live planning models in real time, from the AI tools your team already uses.
04	Advanced Workflow	Multi-step review paths, custom approvals and sheet-level scoping tailored to complex org structures. Precise governance and clear accountability across non-standard organizational rollups.
05	Application Lifecycle Management ALM	Automated migration of sheets, models and reports across sandbox, test and production. No manual rework or sync errors, and faster, more confident release cycles.

INCLUDED FEATURES & PACKAGING

Everything in Adaptive, and more

8,000**Pooled Flex Credits per seat, annually**

Included with standalone seat offerings to power AI queries and agent actions.

Complete functionality

All core Workday Adaptive Planning capabilities, plus full entitlement to ADI, Advanced Workflow, ALM and MCP.

Transparent governance

Track real-time consumption and usage trends in the Planning Center dashboard.

WHY UPGRADE TO PRO?

What your team gains

Smarter insights

Speed up variance analysis and decision-making with native AI.

Higher productivity

Save hours of manual report migration between non-production and production environments.

Enterprise scalability

Roll out complex approval workflows tailored to your operational hierarchy with confidence.

Ready to see Adaptive Pro in action?

Revelwood's Adaptive experts can show you what Pro can do and map your upgrade path.
