ADAPTIVE vs. ADAPTIVE PRO

Everything you rely on in Adaptive, plus what finance needs next

Adaptive Pro isn't a different product. It's the full Workday Adaptive Planning platform with a new layer on top: smarter workflow, workforce modeling, automated migration and **Workday's AI – including Decision Intelligence.**

TWO EDITIONS, ONE FOUNDATION

Pro builds on Adaptive. It doesn't replace it.

Everything your team uses in Adaptive today carries into Adaptive Pro. The difference is what sits on top.

Adaptive Pro adds The enhanced version

Advanced workflow
Dynamic, multi-step approvals that follow any hierarchy.

Org design & scenario modeling
Model org changes and see cost and health impact first.

Lifecycle management
Zero-touch migration across Dev, Test and Prod.

MCP & A2A
Connect AI and agents directly to live planning data.

Decision Intelligence
The headline feature: purpose-built AI for the office of finance.

Adaptive from Workday The foundation – included in both

The **core planning platform** finance teams know, with **hubs** for focused planning work, **Predictive Forecaster and Anomaly Detection** to flag what's changing, and **configurable workflow** with tasks, notifications and monitoring.

Flex Credits are sold separately with Adaptive, and are both included and available separately with Adaptive Pro.

+3

NEW APPROVAL CAPABILITIES

Approvals that follow how your business really works

With Adaptive, you configure workflows with hierarchy submit and to-do tasks, notifications and monitoring.

With Adaptive Pro, workflow becomes dynamic: multi-step submit and approve tasks, conditional routing for non-standard reporting paths, and record-based approvals – with guardrails that keep workflows from getting stuck.

1–2 hrs

OF REWORK SAVED PER REPORT

Less manual rework, more time for analysis

Moving sheets and reports between environments is manual work today. **Application Lifecycle Management** automates it – saving 1–2 hours of rework per report and up to **~1 FTE** for a large enterprise.

Org Design brings workforce planning into the same place, so HR and finance can model restructures together using live Workday HCM data.

100%

TRACEABLE AI FOR FINANCE

From "what happened" to "what should we do"

With Adaptive Pro, finance can ask plain-English questions of live planning data through **MCP**, without exports or report building.

Decision Intelligence goes further: explaining variances, modeling risk with Monte Carlo simulations, reforecasting from operational drivers and drafting board-ready narratives, all traceable to the source.

NEW TO ADAPTIVE?

Start with Adaptive Pro

It's Workday's lead offering for new Adaptive customers, so you get advanced workflow and AI from day one.

ALREADY ON ADAPTIVE?

Extend what you have

Adaptive Pro adds new functionality to your current Adaptive instance and keeps building on it over time.

Not sure which fits your team?

Revelwood's Workday Adaptive Planning experts can review your current setup, compare the editions against your goals, and map your path to Adaptive Pro.
