

DECISION INTELLIGENCE vs. MCP vs. Revelwood's MCP LITE

Three ways to put AI to work on your Adaptive data

Upgrade to Adaptive Pro or stay on standard Adaptive– either way, there's a path to AI-powered planning. The right one depends on where you want your AI to live and what it needs to do.

TWO APPROACHES

Bring AI into Adaptive, or bring Adaptive into your AI

AI INSIDE ADAPTIVE

Decision Intelligence

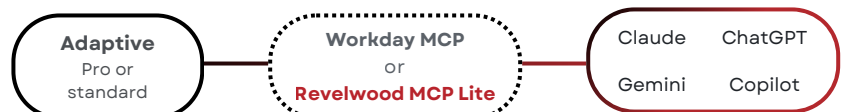

Workday's own finance AI, working directly in your Adaptive Pro instance.

ADAPTIVE INSIDE YOUR AI

Adaptive MCP & Revelwood's MCP Lite

Connectors that let the AI tool your team already uses read your live Adaptive data.

WORKDAY · REQUIRES ADAPTIVE PRO

Decision Intelligence

Purpose-built AI for the office of finance

ASK IT

"Increase revenue by 10%."

Where it shines

The only option that can **write back** to standard, cube and modeled sheets. A **semantic model** gives the AI a structured view of your data, and multiple users can work in it.

Keep in mind

It works inside Workday, so it can't be used in other AI tools, browse the web, pull public data or run on a schedule.

WHAT IT TAKES

Adaptive Pro + Workday Flex Credits

WORKDAY · REQUIRES ADAPTIVE PRO

Adaptive MCP

Workday's connector to your AI tool

ASK IT

"Which salesperson had the largest sales increase this year?"

Where it shines

Your AI tool reads Adaptive data – including **modeled sheets** and sheet configuration – alongside everything else it can do: scheduled tasks, other connectors, web data and shared chats.

Keep in mind

It's read-only, so changes to plan data still happen in Adaptive.

WHAT IT TAKES

Adaptive Pro + Flex Credits + your AI tool's subscription or tokens

REVELWOOD · NO UPGRADE NEEDED

Revelwood MCP Lite

AI for standard Adaptive

ASK IT

"Which customer had the most activity last month?"

Where it shines

Built on Adaptive's public APIs, it connects **standard Adaptive** to Claude, ChatGPT, Gemini or Copilot. Ask about metadata, standard and cube sheets, reports and exchange rates, with multi-user support.

Keep in mind

A right-sized, read-only scope: no modeled sheets or sheet configuration.

WHAT IT TAKES

Revelwood subscription + your AI tool's subscription or tokens. No Adaptive Pro or Flex Credits.

Which one is right for you?

Decision Intelligence

You want AI that can analyze and update your plans, built for finance.

Adaptive MCP

You're on Adaptive Pro and your team already lives in an AI tool.

Revelwood MCP Lite

You want AI on your Adaptive data now, without upgrading.

Functionality as of September 29, 2026. Capabilities continue to evolve.

Find your path to AI-powered planning

Revelwood can walk you through all three options, show MCP Lite and Decision Intelligence in action, and help you choose the right path for your team.
