

Introducing Adaptive Pro

Adaptive Pro adds advanced workflow, workforce modeling, automated migration and Workday's AI to the planning platform you already know – and it's **the only way to unlock Decision Intelligence**.

Workday's lead offering

The priority focus for new Adaptive customers.

Extends your instance

Adds new functionality to your current Adaptive environment.

AI built into planning

Brings Workday's AI capabilities directly into Adaptive.

An evolving product

Continues to build on existing features over time.

WHAT'S INCLUDED

Four capabilities that upgrade how finance plans

Advanced Workflow

Multi-step submission and approval across any hierarchy, with conditional routing, sheet-level scoping and guardrails that prevent stuck workflows.

Org Design & Scenario Modeling

Model unlimited drag-and-drop org scenarios from Workday HCM data, see cost and org-health impact, then execute in the system of record.

Application Lifecycle Management

Zero-touch migration of sheets and reports across Dev, Test and Prod – eliminating manual rework and human error.

.....
1-2 hrs saved per report

~1 FTE potential savings for a large enterprise

Adaptive MCP

Ask plain-English questions of live planning data – actuals, budgets, forecasts and what-ifs – with no report building or stale Excel exports, and Adaptive permissions respected.

EXCLUSIVE TO ADAPTIVE PRO

Decision Intelligence

Purpose-built AI for the office of finance – not a general-purpose chatbot.

Only with Adaptive Pro

Decision Intelligence is available exclusively to Adaptive Pro customers.

01

Variance & Root Cause

Decompose performance shifts across dimensions with mix-shift, correlation and driver rankings – explained in plain language.

02

Probabilistic Modeling

Run Monte Carlo simulations to calculate P10 / P50 / P90 outcomes and quantify risk across key forecast assumptions.

03

Driver-Based Reforecast

Project financial outcomes directly from operational inputs like pipeline, headcount and conversion rates.

04

Narrative Generation

Produce executive-ready board readouts, quarterly summaries and variance narratives grounded in your data.

Works with all your data

- Reads Adaptive sheets, modeled sheets and cubes
- Drag-and-drop CSV or Excel files (up to 50 MB)
- Auto-joins CRM exports to Adaptive forecasts

Semantic layer

- Auto-builds a traceable model of dimensions, measures and formulas
- Correct misclassified columns just by telling DI in chat
- Persistent workspaces save data, history and formulas

100%

No "black box" math

Every metric traces back to source rows and applied formulas – ask DI to show its reasoning, down to the cell.

Ready to see what Adaptive Pro can do for your team?

Revelwood's Adaptive experts can assess your current instance, map your upgrade path, and show Decision Intelligence in action on your own data.
